

RAJVINDER KAUR

Full-Stack Developer | Backend-Focused | AI/ML Enthusiast

☎ +91-6290303576 ✉ rajvinderkaurpersonal@gmail.com [in LinkedIn](#) [GitHub](#)

EDUCATION

SRM Institute of Science and Technology (KTR)

2024–2028

B.Tech - Computer Science and Engineering - CGPA: 9.9

Chennai, Tamil Nadu

St Xavier's Institution Panihati

2022–2024

12th Grade - Science Stream - 94.5%

Panihati, India

TECHNICAL SKILLS

Programming Languages: Java, Python, C, C++, SQL
Backend Development: Node.js, Express.js, FastAPI, RESTful APIs
Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS
Databases: PostgreSQL, MySQL, MongoDB
Tools: Git, GitHub, VS Code

PROJECTS

Intelligent AgTech Solution | Python, Flask, PyTorch (ResNet CNN), Scikit-learn (Naive Bayes), OpenCV 2026

- Built an AI-powered AgTech platform integrating a **ResNet-based CNN (transfer learning)** for crop disease prediction, achieving **92% classification accuracy** on real-world leaf datasets.
- Designed a **Naive Bayes-based crop recommendation system** using soil nutrients, weather, and regional data, improving recommendation accuracy by **18% over baseline models**.
- Engineered a **Flask-based backend with real-time inference APIs** and a **live agri-marketplace module**, enabling **500+ users** to discover and access agricultural products with low latency.

Sentiment Insight Analyzer | React, FastAPI, HuggingFace BART-MNLI, PyTorch, LangID

2025

- Built a **multilingual sentiment and severity analysis system** supporting **11 Indian languages** using **LangID-based language detection**.
- Implemented **zero-shot transformer classification (facebook/bart-large-mnli)** to infer sentiment and map predictions to **severity levels (Low/Mild/High)** using deterministic guidance logic.
- Developed a **FastAPI backend** with structured JSON responses and integrated a **React frontend**, designing a **robust end-to-end inference pipeline** handling translation, classification, and noisy multilingual inputs.

NeuroRead | React.js, FastAPI, Python, Gemini API, Groq API, Chrome Extension

2026

- Engineered an **AI-powered adaptive learning system for dyslexic users**, combining a full-stack web platform with a **Chrome extension** to transform complex text into accessible formats.
- Developed and integrated **LLM-based pipelines (Groq inference & Gemini API)** for real-time text simplification, keyword extraction, and contextual explanation to enhance reading comprehension.
- Designed and implemented **multi-modal assistive features** including audio-supported reading, word-level definitions, and interactive practice modules, leveraging **Chrome APIs** for real-time assistive reading across websites.

EXPERIENCE

Backend Developer Intern

Apr 2026 – Present

Workhance LLP

Remote

- Designed and developed **RESTful APIs** using **Node.js** for core platform features and backend services
- Built and managed **SQL database schemas and optimized queries** for efficient data storage and retrieval
- Implemented **authentication and authorization mechanisms** (JWT/session-based) to secure user access
- Tested and debugged API endpoints using **Postman**, ensuring reliable request-response handling
- Deployed backend services and managed API environments for integration with the production system

AI-ML Virtual Internship (EduSkills & AICTE)

Jan 2026 – Mar 2026

Intern

Remote

- Completed a **10-week AI/ML internship** covering supervised learning, CNNs, and model evaluation
- Built ML models for **classification tasks** with feature engineering and performance evaluation

CERTIFICATIONS

- Programming in Java — NPTEL
- Fundamentals of Object-Oriented Programming — NPTEL

ACHIEVEMENTS

- **3rd Place — CryptoSolve: Fintech App Expo**, organized by the Fintech Vertical, Department of Computing Technologies, SRM Institute of Science and Technology (2025)
- **3rd Place among 72+ teams — ComputeX 1.0** (24-hour hackathon), organized by Directorate of Career Centre (DCC) in collaboration with Department of Computing Technologies, SRM Institute of Science and Technology (2026)
- **Finalist (Top 21 teams) — HACKCELER8 National Level Hackathon**, organized by IEEE Society on Social Implications of Technology (SSIT), SRMIST (2025)
- **Deployed and sold a Cafe Management System** (Java, MySQL) to a local restaurant.

LEADERSHIP & ACTIVITIES

PLACFV's, SRM IST

Oct 2025 – Present

Corporate Member

Chennai, India

- Coordinated **campus placement drives**, managing **interview scheduling**, **candidate flow**, and on-ground logistics.
- Coordinated drives involving **100+ students** and multiple recruiters across hiring cycles.

IEEE SRMIST Student Branch

Sep 2025 – Present

R&D Member

Chennai, India

- Contributed to **research and development initiatives** by exploring emerging technologies and supporting **technical project ideation**.
- Collaborated in organizing **ideathons**, **technical events**, and **workshops**, driving student participation in innovation activities.
